III National Workshop on Lyophilization

The Cuban Local Chapter from the International Society of Lyophilization/Freeze Drying (ISL-FD) in association with the Society of Mechanical, Electrical and Industrial Engineers (SIMEI) from the National Union of Architects and Engineers of Cuba (UNAICC), are calling to the 3rd National Workshop on Lyophilization. The present edition will be dedicated to discuss the following topics:

1. New challenges of the ISL-FD for the period 2006-2007.
2. Advances on the lyophilization technology and its interaction with other technological equipments.
3. New applications.

The Workshop will be held on May 26 during a whole day. The conference room from UNAICC, has been selected for the meeting. UNAICC is located on Línea street # 1008 e/ 10 y 12, Vedado, La Habana, almost in the heart of the city.

At this edition, every Institution will have the possibility to present its more relevant paper related to the lyophilization field, as well as to explain its advances and difficulties. Papers should be presented in 15 minutes, leaving 5 minutes for questions and answers. Summaries should be sent to the following email: arosabal@informed.sld.cu before May 15, 2006.

The registration fees are 50.00 CUP for Cubans attendees and 50.00 CUC for foreign one. The fee can be paid by bank transfer, check or in cash, at the registration desk.

For any additional information you can contact the members of the Organizer Committee:
